

Why ?

WHY ? : Like any other resource of your business, your network and internet usage costs money and the first simple rule of business management is:

***'If you can't measure it,
You can't manage it!'***

Analysis of the bandwidth usage of your internet connection will provide the following:

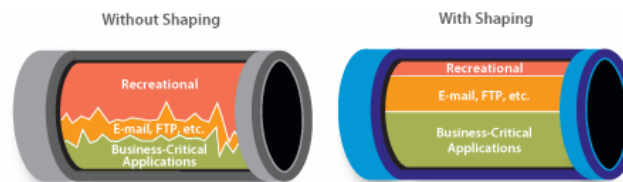

- ☑ **Cost Benefit:** Don't pay for what you don't need.
- ☑ **Security and Risk Mitigation:** Understanding enables prevention.
- ☑ **Knowledge:** Know who's doing what and when.
- ☑ **Performance Evaluation:** Understand the ebbs and flows, peaks and troughs.

What ► How ?

WHAT ? : Bandwidth Monitoring is one of the most crucial activities of an enterprise network administrator. While sufficient bandwidth to perform the 'required' tasks is essential to operation, having an bandwidth excessive to the needs of your business may be unnecessarily costing you money. Excessive overuse of your network bandwidth can be avoided when it is correctly identified.

HOW ? : Using state of the art network analysis and traffic shaping devices by Packeteer, networks can be analysed down to the individual data elements showing traffic type/usage/protocol and source/destination. We provide the equipment and the expertise to install and analyse. We produce reports and recommendations based on our findings.

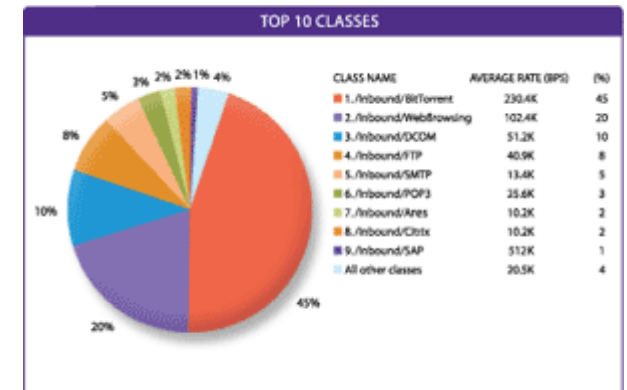

Collect ► Analyse ► Report

COLLECTION: Ambient IT can monitor your internet bandwidth detecting and separating all inbound and outbound traffic by type, destination and source.

ANALYSIS: The traffic can then be analysed with regard to it's validity and purpose, the bandwidth usage and the cost of the service.

REPORT: Production of graphs and statistics to verify usage and costs enables better ability to chose the right internet connection type and pipe sizes and detect the cause of any bottlenecks between you and the information super highway.

Our Services:

- ☑ Business Technology Infrastructure
- ☑ Corporate Policies and Documentation
- ☑ Redundancy and Disaster Recovery
- ☑ IT Management & Strategy
- ☑ System Administration and Support
- ☑ Training / Mentoring / Staff Appraisal
- ☑ Equipment & Software Purchasing
- ☑ Product Evaluation / Assessment

**Are you paying too much for
your internet ?**

Is your internet access slow ?

**Do you know who's using the
internet and for what ? ?**

**Do you suffer from network
bottlenecks ?**
